

The background is a deep blue gradient with a subtle pattern of white dots, resembling a starry sky. Overlaid on this are several white geometric elements: a large circular arc on the left side with a degree scale ranging from 150 to 260; two smaller concentric circles with arrows indicating clockwise rotation, one in the top left and one in the top right; and another set of concentric circles with arrows in the bottom left. The overall aesthetic is futuristic and technical.

# HOW & WHY CRYPTO IS THE FUTURE

BY: HERMAN PARDO

# Modules:

- Basics:
  - What is crypto?
    - Define the technology
      - Blockchain, DAGs, etc.
    - How it came to be and current status
      - History of its creation
      - Tech barriers it had to overcome to get to where it is today
      - Current status today
        - Sectors:
          - Coins
          - DeFi
          - NFT
          - DAOs
          - Metaverse
  - Why is it important?
    - It's the future and you'll be using no matter what
      - Work, play, organizations, political, etc.
  - What problem is it solving?
    - Comparing current tech to crypto
    - How current companies will disappear if they don't adopt crypto, such as real estate NFTs.

# Modules:

- **Crypto Ecosystem:**
  - Go over entire crypto ecosystem
    - From Bitcoin, to Eth, to Sol, etc.
      - Explore apps within those ecosystems
  - Compare and contrast ecosystems
    - Speed, TPS, fees, etc.
  - Splitting ecosystems into sectors:
    - Coins, Projects, DeFi, NFT, DAOs, Metaverse, etc.
    - Demonstrate and explain their current counterpart in current tech
      - Crypto versions of social media, real estate, art, property, supply chains, etc.
- **How they are solving their non decentralized counterparts' problem**
  - Decentralization
  - Governance
  - Stability
  - Privacy

# Modules:

- Why is all this relevant? What's it got to do with me?
  - The growth in the crypto sector
  - Available high paying positions
  - Remote work environment
  - Global community, world of knowledge
  - How current tech will evolve into crypto tech
- What's its future?
  - Monthly "By the numbers" update of the crypto sector
    - Ecosystems, dApps
    - User base growth
    - Worldwide adoption rates and trends
  - Use the above info to create models, statistics, and predictions
- ADVANCED
  - ICOs, crowd loans, auctions
  - Chain Security
    - ZK Proofs, private keys, etc.
  - Staking
    - Derivative staking, super fluid staking, etc.
  - Programming languages of crypto
    - Solidity, RUST, C++, JAVA, etc.
  - Much more....
